To prevent spills of fuel on the Dock and reduce fire hazards, portable fuel containers that are not in use must be stored with caps tightly secured in an approved flammable liquid storage cabinet or locker. Avoid storing gasoline indoors and near ignition sources.

PROCEDURE:

1. **Portable fuel containers used on the Dock** must be labeled with an individual or department name and stored in this locker or other EH&S-approved flammable storage cabinet. Use tags inside this locker to mark your name.

2. **Unidentified fuel containers** left on the Dock are an environmental and safety risk. Fuel containers left unattended on the dock must be placed in this locker. These containers will be dated, tagged, and disposed in 60 days if unclaimed.

3. **To reclaim your container and avoid disposal**, label it with individual or department name and notify EH&S at x3347 (508-289-3347).
